WELCOME TO 2024 IEEE ATOMS

ATOMS is a biennial forum for the exchange of information on the research and development with a focus on models, measuring techniques and simulation tools for engineering. It also aims to bridge the gap between different areas, such as electronic engineering, communications, signal processing, electric engineering, and environment protection, in terms of methods for modeling and experimental validation.

ATOMS has single-track invited oral presentations given by prominent researchers and poster sessions that facilitate valuable interaction and networking among the delegates.

We encourage you to submit leading-edge, state-of-the-art contributions in electromagnetics, radiowaves and antennas, signals and systems, communication systems, computing systems and information theory, remote sensing systems, photonics and electrooptics, electronic technology, artificial intelligence, applications in energy and electric systems, mechanical and electromechanical systems, environment protection.

ATOMS 2024 is organized by Constanta Maritime University and by the National University of Science and Technology POLITEHNICA of Bucharest. It is technically co-sponsored by the IEEE Romania Section, by the IEEE Romania Section - Antennas and Propagation Society / Council on RFID Joint Chapter, by the IEEE Romania Section - Communications Chapter, and by the Romanian Association on Antennas and Propagation (RAAP).
